

# **WD Caviar** Black

## **Desktop Hard Drives**

WD Caviar Black drives combine a high performance electronics architecture with a rock solid mechanical architecture to deliver the perfect storage solution for your fully-loaded PC or maxed out gaming machine. Cool drive operation, no-touch head technology, leading-edge vibration protection ensure enhanced reliability. And we back it all up with a 5-year warranty.

**INTERFACE** SATA 6 Gb/s SATA 3 Gb/s

WD2001FASS

WD1002FAEX WD1001FALS

**MODEL NUMBERS** 

WD7501AALS

WD6401AALS

WD5001AALS

WIDTH/HEIGHT 3.5-inch/1-inch

**ROTATIONAL SPEED** 7200 RPM

**CAPACITIES** 500 GB to 2 TB

Note: Not all products may be available in all regions of the world.

### **Product Features**

#### **High Performance Electronics** Architecture

- **Dual processor** Twice the processing power to maximize performance.
- Colossal cache Bigger, faster cache of up to 64 MB means faster performance

#### **Rock Solid Mechanical** Architecture

- Dual actuator technology A head positioning system with two actuators that improves positional accuracy over the data track(s). The primary actuator provides coarse displacement using conventional electromagnetic actuator principles. The secondary actuator uses a piezoelectric motor to fine tune the head positioning to a higher degree
- of accuracy. (2 TB only)

   StableTrac<sup>TM</sup> The motor shaft is secured at both ends to reduce system-induced vibration and stabilize platters for accurate tracking, during read and write operations. (750 GB, 1 TB, and 2 TB models only)

  NoTouch™ ramp load technology
- The recording head never touches the disk media ensuring significantly less wear to the recording head and media, as well as better drive protection in transit.

#### **Massive Capacity**

WD Caviar Black SATA drives are available in capacities up to 2 TB.

#### 5-year limited warranty

### Compatible

We perform tests on hundreds of systems and a multitude of platforms in our FIT Lab™ and Mobile Compatibility Lab to give our customers confidence that our drives will work in their systems.

## **WD Caviar** Black

<sup>&</sup>lt;sup>1</sup>As used for storage capacity, one megabyte (MB) = one million bytes, one gigabyte (GB) = one billion bytes, and one terabyte (TB) = one billion bytes. Total accessible capacity varies depending on operating environment. As used for buffer or cache, one megabyte (MB) = 1,048,576 bytes. As used for transfer rate or interface, megabyte per second, MB/s) = one million bytes per second, and gigabit per second (Gb/s) = one billion bits per second. Effective maximum SATA 3 Gb/s and SATA 6 Gb/s transfer rates calculated according to the Serial ATA specification published by the SATA-10 organization as of the date of this specification sheet. Visit vinewsatai-org of details.
